DRAIN BASINS

GPK's Drain Basins are the perfect fit for any storm water collection system. Drain Basins provide collection points, while offering connections for different types of pipe, sizes, and differing pipe elevations. GPK Drain Basins are made specific to your drainage needs.

INLINE DRAINS

Inline Drains provide collection points at the beginning of a line in a storm water collection system or at any point where collection is needed on a storm water line. Through the use of a 90 degree bend or a tee with a vertical riser an inline drain can be used for any storm water collection need.

BENEFITS:

Water Tight Joints: GPK's **Drain Basins** and **Inline Drains** offer a wide array of water tight connections including Corrugated HDPE, and PVC pipes to include SDR35, SDR26, SCH40, C900, and other profile pipes.

Custom Made: GPK's Drain Basins are custom made to ensure the exact design of virtually any storm water system is met.

Reduced Installation Time: Installation time is reduced when compared to alternatives such as concrete structures.

All GPK Drain Basins, Inline Drains and most grates are **Made in America.**

DRAINAGE PRODUCTS

SUMP ELIMINATOR

The Sump Eliminator is installed during the production process at the level of the lowest outlet. The Sump Eliminator prevents water pooling by guiding the collected water through the lowest outlet. The elimination of pooling stagnant water helps prevent the growth of bacteria and insect reproduction.

Sump Eliminator

GRATES & COVERS

Domed Grate with Frame

Drop in Domed Grate

Round Drop in Grate

Round Grate with Frame
